**EC-211 Principles of Macroeconomics**  
Principles and problems of macroeconomics: national income, employment, inflation, economic growth, monetary and fiscal policy, interest rates, international economics and alternative economic systems.

**EC-212 Principles of Microeconomics**  
Principles and problems of microeconomics: price, value and distribution, and economic decision making under different market structures. Emphasis is placed on the efficient allocation of resources by firms and owners of the factors of production.

**EC-311 Intermediate Macroeconomics**  
This course provides intermediate-level analysis of the determination of economic aggregates, including national income, employment, inflation and economic growth. This course will focus on both theory and applications. The roles of monetary and fiscal policy, private sector shocks and the transmission of the same via the financial sector.

**EC-312 Intermediate Microeconomics**  
This course provides intermediate-level analysis of the determination of price, resource allocation and income distribution in different market structures as these may be affected by taxes and subsidies and other interventions. This course will focus on both theory and applications.

**EC-450 International Economics**  
An examination of international trade and economic development. Topics include trade policy, international monetary regimes, the determination of exchange rates, and international capital flows.
