

# USING REVIEW STATUS WITH BLACKBOARD CONTENT

The **REVIEW STATUS** tool allows the Instructor to track user review of specific content items. Once the Instructor enables the tool for an item, each Student tracks their progress. A **Mark Reviewed** button appears on the item when the user opens the content Area. After reviewing the item, the Student selects this button to mark it Reviewed. The Instructor may check the status of Student reviews on the **PERFORMANCE DASHBOARD** page.

To set REVIEW STATUS on a content item, select the drop-down arrow associated with that item, and choose SET REVIEW STATUS.

Click the ENABLE radio button and click SUBMIT.

The student, when he comes to that item, will see the MARK REVIEWED button below it, and when he's reviewed the material, can click that button, verifying that he's done the task.
