- Credits that can be used toward a Shenandoah University MPH degree

Dual Degrees with Master of Public Health

Shenandoah graduate students in the Master of Physician Assistant Studies and the Doctor of Pharmacy programs can add a dual degree in public health. These rigorous programs are designed for students desiring to enhance their career opportunities with specific training and expertise in the public health discipline.

Key Features

- Wide range of career opportunities
- Designed for working professionals, health professions students and others interested in advancing their public health training
- Interdisciplinary and interprofessional viewpoints
- Focused on rural and underserved populations
- Online programs with flexible part-time and full-time study options available

“A career in public health allows people to contribute to preventing injury and illness across populations at many different levels, with the potential to reach thousands of people at one time. The variety of jobs available makes public health a good fit for those who seek to serve others and make an impact.”

— Michelle Gamber, DPH
Director of Graduate Public Health Programs
