

# Shenandoah University – Amherst Family Practice and Selma Medical Associates

*PGY1 is affiliated with the Shenandoah University School of Pharmacy*

## RESIDENCY OVERVIEW

The PGY1 Pharmacy Residency (Ambulatory Care Setting) is conducted by Shenandoah University School of Pharmacy and two outpatient physician practices located in Winchester, VA.

The residency has an emphasis in ambulatory care and new outpatient care models. It is primarily based in two physician practices, Amherst Family Practice and Selma Medical Associates. The resident will participate in comprehensive medication management, direct patient care pharmacy services, coordination of care, post-discharge transitions of care, and activities to promote quality improvement in medication use. There are also experiences in other outpatient practices. The residency will develop a clinical pharmacist skilled in providing patient-centered transitional and outpatient pharmacy services by working collaboratively with other healthcare providers and professionals to improve patient outcomes.

The resident will participate in practice-driven projects and evaluation of current patient care services in order to develop leadership and management skills while learning the role of pharmacy in an outpatient healthcare setting. Staffing requirements are met through work within the community. Other requirements include presentations to healthcare providers, completion of projects designed to improve the medication use process, and at least one research project suitable for presentation and publication.

The overall goal of the residency is to develop a competent pharmacist qualified for entry into a PGY2 Ambulatory Care residency, clinical practice within a coordinated care model, or a practice-based academic or non-academic position.
